

# **YOU'VE BEEN CONNED**

## **COVID-19 VACCINES WORK, BUT FOR THE WRONG REASONS**

You should be receiving vaccines that create antibodies and T-cells against a coronavirus. Instead you are getting a pretend vaccine that instills 40 trillion RNA/DNA particles to make SPIKE PROTEIN that produces antibodies and T-cells against SPIKE PROTEIN, not specifically against CORONAVIRUS!

While the RNA/DNA vaccine does increase immunity, the effect is only temporary and continual booster shots will be needed for the remainder of life. Following vaccination, spike protein will be produced abnormally in cells that line the inside of your blood vessels and will induce imperceptible blood clots in small arteries which may raise blood pressure and eventually lead to heart failure.

Some cardiologists say this happens 60% of the time.

This is happening now in children who are vaccinated.

**DON'T LET THEM VACCINATE YOUR CHILDREN!**
